Title: Statistical Programmer  
Job Code: JF0511SP

Job Description: Statistical Programmer

A global pharmaceutical company located in the Northern Suburbs of Chicago is looking for an Experienced Clinical Statistical Programmer with at least 2-1/2 years of clinical programming experience.

These individuals will be generating analysis, reports and graphs for individual studies and ISS, ISE; NDA submission to FDA. Analyze and construct logical database to facilitate programming for statistical reports and analysis, and provide consistency between records. Process programming requests to produce listings, tables and graphs for both safety and efficacy analysis. Ensure conformance to standard output, and avoid duplication of effort. Check output; identify and resolve database, data, logic or programming problems. Ensure accurate reporting; listings, tables and graphs reflect the database. Data is within expected range. Effectively manage deadlines or critical milestones on assigned projects. Design and develop various software and systems to effect generalized programming effort across projects. Improve productivity and efficiency; promote continuous improvement.

The ideal candidate will have a Master's or PhD in Statistics, Computer Science, Mathematics or a related field.

ASG, Inc. is a national company dedicated to providing experienced professionals to the Pharmaceutical, Biotech, Healthcare, Market Research, and Financial/Banking industries. We are constantly looking for quality individuals who can perform the roles of Statistical Analysis, Data Analysis, SAS Programming, Medical Writing, Regulatory Affairs, Data Management and Clinical Research. We view our consultants as full-time employees with our company, offering benefits including medical, dental, 401k, paid vacations, and many more. Keeping great consultants depends on how we treat you. Our job is to keep you focused on your work and to provide you with a comfortable working relationship with us, your business partner, ASG.
