Title:
Clinical SAS Programmer/MedDRA

Job Description:

South Bay client is in need of a Clinical SAS programmer with 5+ years of clinical programming experience using SAS in a biotech or pharmaceutical environment.

Candidates experience needs to include:

- COSTART and significant MedDRA experience
- MedDRA experience should include some implementation experience, either writing software to do adverse event coding, or using a package to do so.
- Adverse event report writing using MedDRA terms
- Experience with DsNavigator software a big plus

This is a 6 month contract, potentially could be long term.

If the candidate does not have MedDRA implementation experience, there is no need to apply.
