

We currently have a new position available within our Milwaukee market. Help us develop and grow our Portfolio Risk Management department! We are looking for someone to perform ongoing modeling, analysis, and tracking of loan production, portfolio analysis, and market segmentation to understand the credit quality of the markets and business lines. Review credit performance and establishes forecasts. Responsible for the credit control of the business lines; promotes adherence to credit policies and controls. Report and model based on portfolio trends and condition.

Requirements include:

7+ years of related experience in lending and/or credit risk, portfolio management and statistical and analytical experience.

Experience in developing statistical models using SAS software utilizing a variety of internal and external data sources; development of quantitative modeling and credit analytics; proven ability to convey complex topics in simple terms; and portfolio risk modeling, stress testing, trend analysis, loss forecasting and portfolio segmentation, especially as related to retail product types.

A minimum of 3 years of experience in preparing financial projections, spreading financial statements and preparing written analysis reports.

We are proud to be an EEO/AA employer M/F/D/V. We maintain a drug-free workplace and perform pre-employment substance abuse testing. To apply for this position, visit our website (www.associatedbank.com).
