Operations Research Analyst- Parsippany, NJ

A global organization running the world's largest vacation property exchange is seeking an Operations Research Analyst in the Global Revenue Management & Analytics Group.

The Operations Research Analyst will be a key contributor to the team's output by participating in research and analysis for planning and optimal decision making. In particular, this position will have responsibilities for modeling and forecasting supply, demand, transactions, and revenue at various levels of aggregation. Key responsibilities will include delivering forecasts at micro levels.

Qualifications:

- Graduate degree in Operations Research, Industrial Engineering, Statistics, Econometrics, Mathematics, Economics, or related field.
- Familiarity with statistical time series methods such as ARIMA and exponential smoothing is required.
- Experience in an analytical capacity developing and/or applying quantitative methods for forecasting in a business environment is required.
- Experience forecasting at a highly disaggregate level is desirable.
- Proficiency in SAS programming required.
- Previous experience forecasting in industries such as hospitality, travel, and rental is desirable.
- Previous experience forecasting for sales and operations planning or supply chain planning is desirable.

Salary: \$50-70K
