Senior Scientist- Stamford, CT

Leading-edge consumer credit scoring company headquartered in Stamford, CT seeks a Senior Scientist reporting directly to the Vice President – Analytics and Product Management

This position leads annual refreshment of score cards, initiates research and analysis, participates in technical and non-technical discussions with potential clients and business partners, assists in management of centralized product development process functions, and works closely with senior management to establish company goals around product development and is responsible for annual maintenance/updating of the model

Responsibilities:

- Supervise direction of data management process, in conjunction with partners' product and analytic team members
- Work as part of analytic team developing annual score card refreshments
- Write, publish and present statistical/credit research and white papers for technical and non-technical audiences
- Execute analytical projects, lead project development efforts for statistical models, data analysis and decision-support tools
- Support sales force and marketing organizations by providing analytical expertise
- Direct statistical model production and quantitative analyses

Requirements:

- Proven track record for leading/executing complex analytical projects
- Familiarity with credit bureau scoring, data and model interpretation process
- Advanced degree, preferably in Statistics or Mathematics; PhD preferred
- Minimum of 10 years experience in statistical modeling/data analysis, including large data set management/manipulation using advanced SAS programming
- Excellent communication, organization and interpersonal skills
- Proven ability to train/mentor statistical professionals
- Strong presentation skills to both technical and non-technical audiences
- Some travel required

Salary: \$120 - \$160k
