Senior Associate - Pricing Analytics – Chicago, IL

Major Financial Services firm near Chicago seeks a Pricing Analytics professional who will have full cycle accountability for designing and executing standard and ad hoc, complex statistical and business analysis projects. The role of this Senior Associate is to produce targeted data that meets Pricing Strategy business decision-making information needs using SAS, query or scripting language and software tools. Incumbents must determine requirements and establish valid data extraction specifications. Working independently, they design project plans, extrapolating and manipulating information from internal/external data sources, and present results.

Successful candidates will have:

- Master's degree in Statistics, Quantitative Management, Econometrics, etc., or the equivalent in training and experience.
- Minimum of two years post academic work experience performing applied statistical analysis and modeling or research design using statistical software and other analytical tools in mainframe, UNIX or PC environments.
- Highly developed SAS programming skills in UNIX or mainframe environment and all Microsoft Office applications.
- Thorough understanding and ability to apply marketing and finance principles.
- Advanced knowledge and ability to apply one or more query and scripting languages and software tools.
- Highly developed written and oral communications skills and presentation skills that include the capacity to present technical material to technical and non-technical audiences effectively.

Salary: \$70-80k
