Healthcare Researcher – Long Beach, CA

Southern California innovative HMO seeks Healthcare Researcher to provide the delivery of healthcare informatics research and analysis services to all departments via development of research design, statistical methods and data analysis, using healthcare administrative and survey data. The Researcher will develop quantitative measures to support business decisions with a focus on utilization and quality measures. S/he will perform data management and reporting by conducting relational data extraction, claims data manipulations, survey and claims data analysis, and by creating quantitative and business analysis of the Company administrative data. The Researcher will manage information and disseminate the results via appropriate reports, develop programming codes and implementations by writing SQL and SAS programming language and other potential analytical tools including COGNOS reporting environments.

Requirements:

- Experience in healthcare setting. (Managed care experience preferred)
- Minimum of one-year post graduate, and non-academic experience required.
- Strong computer knowledge and excellent SAS and SQL programming skills
- Good understanding of application of statistical methodologies in planning and analyzing administrative and claims data.
- Experience in using and manipulating large-scale data sets preferred.
- Strong interpersonal skills, including excellent written and oral communication skills.

Salary \$60-70k
