

[SAS Data Analyst Programmer](#)

MEDTAP International provides health economic and outcomes research and consultancy services to industry, health service and government clients around the world. MEDTAP scientists perform challenging work in a stimulating, collegial environment where everyone is

dedicated to conducting the highest quality research in the industry. We currently have an opening in our Bethesda, MD headquarters for an experienced Statistician/SAS programmer.

Job Responsibilities

- Prepare, manage and analyze research data sets (e.g., clinical trial, medical claims, multi-stage sample survey) using standard statistical packages (e.g., SAS, S-Plus)
- Collaborate in studies designed to evaluate the value of new health care interventions, including pharmaceuticals and medical devices.
- Assist in the development of project reports and presentation of study findings, including the creation of graphical output directly from study data.
- Serve as liaison between scientific and IT to support system development

Job Requirements

- Master's degree or M.P.H. in health services research or statistics preferred with 4-6 years work experience; or BA/BS in biostatistics or other quantitative discipline (e.g., mathematics, economics) with 8+ years work experience
- A minimum of five years programming experience in research environment; experience with clinical trials or management and analysis of large and complex (relational) healthcare databases is preferred.
- Proficient in SAS or S-Plus (5+ years experience), with experience in the following preferred
 - SAS ODS outputs
 - Base SAS datastep programming and macro facility
 - SAS Graph
 - SAS Proc Report
 - SAS SQL
 - Excel and Access
- Experience with Windows 2000 (terminal emulator helpful), UNIX, Citrix XP

Critical Success Factors

- Self motivated
- Organizational skills (attention to detail; multi-tasking; prioritization skills; ability to meet deadlines)
- Excellent written and oral communication skills

MEDTAP values a team-oriented, collaborative approach in its work. The candidate will have an opportunity to work with leaders in the field of pharmacoeconomics and health outcomes research. MEDTAP offers a competitive compensation package as well as the necessary resources and rewards to enhance your career.
